TRUCKS

DIAGNOSTICS FOR COMMERCIAL VEHICLES

TRUCKS is a professional diagnostic tool for workshops. TRUCKS has an extensive database with excellent coverage for light and heavy commercial vehicles, trailers and buses.

TRUCKS is a highly efficient diagnostic tool for the workshop with functionalities such as Intelligent System Identification (ISI) and Intelligent System Scan (ISS). With features like setting of parameters, configurations, adjustments and calibrations, you can perform diagnostics on many vehicles in a short time.

TRUCKS has many advantages like fast and reliable diagnostics, user friendly software, quick installation and is easy to update.

AUTOCOM TRUCKS is used by many satisfied customers like workshop technicians, vehicle fleet owners, vehicle inspection companies, roadside assistance organizations, police, military and schools.

USER FRIENDLY

TRUCKS: so easy, you don't even need a manual.

FAST AND RELIABLE

With TRUCKS you perform a high quality service for more vehicles in less time.

ORIGINAL DATA

With Original Data from vehicle manufacturers you can rely on the diagnosis.

EXTENSIVE DATABASE

TRUCKS database has a great coverage for the vehicle brands on the market.

AUTOCOM TRUCKS & CDP+

In order to use TRUCKS you need a vehicle communication interface (VCI). Our latest VCI is called CDP+. You buy TRUCKS and CDP+ in a product kit which includes user license (1 year), cable bundle and a case. We offer a life time warranty as long as you have a valid license.

TRUCKS

TRUCKS software allows you to perform diagnostics on trucks, buses, vans and trailers. With ability to read and erase fault codes, set parameters and configurations, make adjustments and calibrations. TRUCKS comes with a 1 year user license with regular updates.

Value Trucks - FK - 2009 - EBS Gen3 (Brakes) - MD136 - 6x2, pusher

AUTOCOM TRUCKS software

**INTELLIGENT
SYSTEM
IDENTIFICATION**

Automatically identifies the correct vehicle system for diagnostics.

**INTELLIGENT
SYSTEM
SCAN**

Scans through all the vehicle systems.

**ORIGINAL
DATA®**

Original Data from the vehicle manufacturers.

CDP+

The TRUCKS software works together with the vehicle communications interface CDP+. This is a truly universal tool which covers all communication standards and protocols necessary to communicate with all types of vehicles. Together with our selection of adapter cables diagnostics on older vehicles and vehicles using proprietary connectors is as easy as it should be. CDP+ is your key to vehicle intelligence.
